

High Impact Assistant Educators Workshop

Have Teach Well come to you with our school-based workshop days! We provide an introductory workshop for education/teaching assistants centred on the science of learning, explicit teaching and a suite of high-impact instructional strategies. Working from a robust research base, the High-Impact Assistant Educators Workshop guides assistant educators through how to embed evidence-based instructional strategies alongside their teachers.

High Impact Assistant Educators Workshop

Workshop Details

The Experience

A full-day workshop, delivered on site at the school, that provides an introduction to / refresher of key principles and practices:

- » A focus on the science of learning, full participation tactics and checks for understanding when working in a classroom or small group setting.
- » Educator action plan to apply techniques into their specific context in the weeks following the workshop.
- » A scheduled school/network leader call post-workshop to discuss key findings and progress.

Who this workshop is for

Schools from across Australia can book the High-Impact Assistant Educator Workshop. We work with both primary and secondary schools and provide video examples from teachers with students of all ages. This workshop is for individual schools and school networks who would like to collaborate on providing this exceptional PL to their education/teaching assistants, in alignment with the practices used by their teachers.

Cost

The cost for a school-based workshop day is \$6,050 (including GST).

Additional travel costs may apply depending on preferred dates and location.

Working in a small school, EA's tend to spend a lot of time with small groups of students. It was nice to be able to do a course that explains some tactics in more detail, focused at EA's specifically.

- Education Assistant, Northampton DHS, WA

How to book a workshop

Fill out the form below or email info@teach-well.com.au to book a workshop. You can also call us at 0411 499 485.

[Click here to book a workshop](#)

Workshop Topics:

- » Key principles from the science of learning that influence student learning and inform high-impact instruction
- » Full participation principles and video examples of what this looks like in different classroom contexts
- » Cognitive science principles that support the importance of Checking for Understanding and eliciting information from every student

Included:

- » Video examples from real classrooms
- » Pre-readings and action plans.
- » Briefing between Teach Well and school/network leaders before and after workshop.

"The workshop gave me a better understanding on why teachers at our school use these strategies. I am excited to starting using some strategies in the class for small group work."

- Education Assistant, Yuna PS, WA
